

Fall 2008 PSCI 110 Lab

Instructor: Cindy Marlatt (Cam)

Office: 323 Strong Hall

Email: cmarlatt@emich.edu

- PSCI 110 Web Site: <http://www.physics.emich.edu/PSCI110/index.htm>
(Check out the section for the PSCI110 labs. The lab manual is found on-line)
- PSCI 110 Labs Web Site:
<http://www.physics.emich.edu/PSCI110/labs.htm>. The lab schedule, my grading table as well as pre-lab lecture notes are posted here.
- Please make sure you have the 17th Edition of the lab manual.

Answering Questions:

- When answering the lab manual's question, you do not have to write out the question
- before answering it. I am only interested in your answers.
- Indicate what question you are answering by writing "Q1", "Q2", "Q3", etc. before each answer. That way I won't get confused as to what you are answering.

General Notes:

- Cell phones and pagers should be turned off or on mute during lab. Using such devices during lab will result in a grade of "0" for that particular lab session, as per lab policy. Please note, this includes the walkie-talkie chirp found on many cell phones.
- Read over the section "A Note to Students". This explains all the policies for lab.
- Read over the lab manual before the start of each lab. If you do not finish your data collection in the 50 minutes allocated for lab, you will lose points for missing data.
- It is a good idea to collect the raw data required first in lab, then do the data table calculations. Finally, look over the lab manual's questions before leaving class and make sure you understand what the question is asking.
- Read over the section "Common Write-Up Mistakes" before doing your first lab write-up.

- Starting around the mid-point of the lab semester, I will post lab scores by randomly assigning you a posting number. This way, you will have an easy way to check your progress in lab. If you do not want me to post your scores, please let me know in advance.
- Tutoring is available through the Society of Physics Students. Refer to
- <http://www.physics.emich.edu/sps/text/SPStutor.htm>. The tutoring schedule is posted in the lab, above the light switches, also.
- Please feel free to email me with any questions and/or comments you have concerning the lab or the lab's web site.
